NUMBER OF RESPONDENTS: 1,375

RESPONSES PER RESPONDENT: 1

ANNUAL RESPONSES: 1,375

NEEDS AND USES: The revision of this information collection requirement is necessary for the continued provision of integrated enterprise and survey data to be used for direct reporting of

suicide events and ongoing population-based health surveillance activities. These surveillance activities include the systematic collection, analysis, interpretation, and reporting of outcome-specific data for use in planning, implementation, evaluation, and prevention of suicide behaviors within the Department of Defense. Data is collected on individuals with reportable suicide and self-harm behaviors (to include suicide attempts, self-harm behaviors, and suicidal ideation). All other DoD active and reserve military personnel records collected without evidence of reportable suicide and self-harm behaviors will exist as a control group. Records are integrated from enterprise systems and created and revised by civilian and military personnel in the performance of their duties. We propose to revise the system to make specific changes that have been recommended for improving the completeness of DoDSER data.
